

Health care has changed dramatically over the past decade.

Difficulty finding a provider, getting an appointment and navigating insurance are among the common challenges facing patients today. Most of these challenges are due to factors beyond the scope of any one health care center. Primary care doctors have been retiring, moving into specialty care or transitioning to concierge models. All of which have stressed the system.

At Community Health Center, we have always tackled these challenges head-on. That's why we've been at the forefront of combining the best health care innovations and technology in our practice.

The result is a new health care model that reflects so many of our core values: Accessibility, Teamwork, Integration and Innovation. So while challenging circumstances have demanded change, we are embracing it to serve you best. And that means you have more ways to connect with us than ever before!

We look forward to having you partner with us. Together we are an unstoppable team in your health care journey.

Your medical home is always here for you.

Making care easy and accessible is our goal.

CHC has six convenient locations.

Mashpee – Main Office

107 Commercial Street
Mashpee, MA 02649

Falmouth

210 Jones Road, Suite 22
Falmouth, MA 02540

Telehealth Visits

Instead of driving to a doctor's office, you can take your appointment from the comfort of your home on a computer, tablet

or phone. This can be a huge time saver, while also avoiding aggravations like having to take time off from work or having to find childcare.

Acne, birth control, bladder infections, burns, depression, ear pain and STDs are among the many services that can be covered in a Telehealth visit with a CHC provider.

Healthcare Hub Kiosks

Healthcare Hubs are one of the newest tools available in the industry and we are proud to be among

the first to offer them. You can access these stand-alone kiosks to receive convenient blood pressure readings or oxygen levels. Everything is done easily on a touch screen.

Call or visit CHCofCapeCod.org for kiosk locations.

MyChart

MyChart is one of the most useful tools for taking a proactive role in managing your health. Through the free MyChart app, you can log into

your account any time of day or night to see your medical records.

Through MyChart, you can manage appointments, request prescription refills, oversee referrals, view test results and send non-urgent messages to your care team.

Remote Patient Monitoring

Remote Patient Monitoring enables patients with chronic illnesses to be monitored from home

in between clinical appointments. We provide you with simple, in-home devices - for example, a blood pressure cuff, scale or glucose monitor - that securely transmit readings to your care team. Patients with hypertension and diabetes are among those that can benefit from this technology.

We Are Here to Help

We understand that all of our patients have different comfort levels with technology. So we are always here

to help! We have a dedicated team member whose sole role is to help patients utilize these new tools. Whether you need help logging in or navigating a website, we're just a phone call away. You can call or text our digital navigator directly at (508) 477-7090 or you can connect with a member of your care team.

And rest assured knowing that your health care information is always safe and secure!
